

I am a subscriber to XM Satellite radio. I subscribe because of the drive on local corporate radio in my city (Omaha, NE). Satellite radio offers options the big corporate giants don't care to program for Americans. Satellite radio also offers local weather and traffic reports for major cities. While I do not live in any of the areas covered by these reports I suspect that the stations on XM that carry local reports will provide a valuable service to citizens of those areas. I urge you to reject the petition of the National Association of Broadcasters -Petition 04-160.

Thank you.
